

# GALBALLY RESERVE PLAYGROUND, HUGHESDALE

---

GALBALLY RESERVE  
PLAYGROUND  
19 ARTHUR STREET  
HUGHESDALE

---

---

Galbally Reserve Playground was developed in conjunction with the Monash City Council and the Level Crossing Removal Authority (LXRA). Once the rail works were completed, LXRA combined with Monash City Council to reinstate the former play space back to the community, bigger and better than ever.

---

YELLOWSTONE  
LANDSCAPING  
WAS SELECTED TO  
CONSTRUCT AND  
DELIVER THE ENTIRE  
PROJECT.

Monash City Council finalised the design, featuring specific elements to suit a range of requirements, including; accessibility, social activity and play space.

Yellowstone Landscaping worked alongside council representatives and provided communication on a continual basis whilst carrying out site safety and environmental checks.

At one stage, Yellowstone could see potential issues relating to drainage and provided feedback to the architects who were appreciative of our recommended solutions.

A significant challenge presented by the project was being able to fit the footprint of the entire park on the ground before excavation

commenced, to avoid entering the tree protection zones. The best minds at Yellowstone discussed the challenge and a strong workable solution was put in place.

Galbally Reserve was a high-profile project with lots of stakeholders to satisfy. Yellowstone were very proud of the reinstatement of the surrounding grounds and lawn establishment that was achieved.

The council were very pleased with the outcome and invited our team to attend the opening day celebrations.

Doug Lord the managing director of Yellowstone Landscaping said, "It's great to see the community enjoying all the hard work we delivered."
