

Environmental Sustainability Policy

Our key environmental objectives are to ensure environmentally responsible practices are established and maintained through all areas and operations. Yellowstone Landscaping is committed to protect and enhance the environment whilst minimizing the impacts of our activities on the world around us.

To achieve this objective, Yellowstone Landscaping has the following strategies and commitments in place:

- Ensure environmental awareness, competency, and involvement of our workforce. Keeping our staff educated and up to date with regular toolbox meetings.
- Assist our clients to achieve their environmental commitments related to our operations involvement
- Seek efficiency in our use of water and energy with the aim of conserving natural resources, reducing atmospheric emission and there by mitigate the effect of negative impacts to the environment
- Practice responsible water and wastewater management and conserve water, where practical.
- Practice responsible materials managements including waste avoidance and minimization, reuse, and recycling.
- Practice responsible energy management to reduce operational costs and greenhouse gas emissions. This involves using efficient approaches of energy use in the office, environment and use of vehicles.
